

Inverted Boat Plan

After Capsize - action items & options

- Secure the CREW, secure the Grab Bag, secure Emergency Tool Bag
- Secure any tool or equipment being used, to boat or person
- The Torch battery is isolated; unscrew top and remove insulator
- Activate the EPIRB, use the GPS for a accurate current position, issue a Mayday via portable VHF
- Spread out the V sheet and secure it.
- If possible, untangle the dinghy and sort it out
- Use Extreme Caution if diving into a tangle of ropes or other dangerous obstacles which will be moving around with the sea motion.
- Get water container(s) from deck locker
- Get a secured line onto the Liferaft and then retrieve it from the cockpit, deploy it.
- Cut holes to access the boat for additional resources; Don't cut into sealed flotation compartments, mostly near the bottom of hulls.
